Digital and voice share the person

The outbound page says the dialer works with inbound digital engagement, and Agent Desktop Plus is the screen where voice, digital, and context are meant to meet. A blend that is only a voice story misses chat and email sitting on the same login.
Antivirus products can block digital text from loading. The technical requirements name that failure. A ’blend’ that cannot show the chat is a desktop failure, not a skill failure.
Include digital in the blend
Check antivirus when text disappears
