One module, one skill, when you need the truth

Skill Transfer may list several skills, and any agent who has one of them can take the call. The same article recommends a single skill in the module when you want reports that mean something.

A shared pool is a valid design. An accidental shared pool is how billing calls show up as a blob. Split modules if the work is different. Keep one module if the pool is the point.

Choose pool or precision out loud

Match the report to that choice
