TLS, and ports that are not universal

Unencrypted APIs are not the story. TLS 1.2 is required. TLS 1.1 is not supported. The requirements also list TLS 1.3 inbound ciphers: AES-128-GCM, AES-256-GCM, and CHACHA20. Studio portal hosts and Studio SIP ports live in the Studio section of that PDF: UDP 5060, TCP 5061 described as beta, proxy UDP 5189 and TCP 5161, a legacy UDP 5188, plus RTP ranges. Do not paste those Studio numbers onto every VCC ITSP trunk. If the trunk guide does not say them, they are not the trunk.

Require TLS 1.2

Keep Studio ports in the Studio box
