What an extract is allowed to remember

Reporting Web Services can move numbers out of the domain. Retention still applies to what Five9 keeps, not to the warehouse you built. Once a row is in your bucket, your policy owns it.

Disabled domains, campaign state, agent data, and numbers have their own retention lines: agent data 60 days, campaign state 120 days, a disabled domain 120 days after closure, DIDs and toll-free numbers 90 days after closure. Do not design a 'temporary' domain and expect the DIDs to wait forever.

Export before the clocks run out

Keep DID retention separate from domain retention
