There is no import button

This track is a teaching bridge. Five9’s public pages name Cisco as a SIP gateway type. They do not publish a wizard that reads a UCCX script or a UCCE dial plan and emits a domain. The planning order still applies on the Five9 side: skills, users, lists, dispositions, profiles, then campaigns. A cutover that starts by ‘moving the script’ skips the objects the script will name.
Call this track a teaching bridge
Start from the Five9 planning order
