Play, Menu, digits, and voice Learn it in 5 minutes

Play speaks a prompt or TTS. Menu takes a choice and has an exit per option. Get Digits and Input collect what the caller types. Voice Input and the Natural Language Processing module are the speech-side blocks in the same chapter. Input is what the ZIP-code web-service example uses, storing ZIP as a variable.
A menu that has no No Match path strands people who press the wrong key. Draw that exit before you draw option 1.
