ServiceNow releases are named Learn it in 5 minutes

The same PDF says the ServiceNow Plus adapter supports the Service Operations and Configurable workspaces, and names the Australia, Zurich, and Yokohama releases. Those names are a support list with a date on it, like the Salesforce package.
There is a portal chapter for configuring the Plus adapter for ServiceNow. Use it for the steps. Use the PDF for which release you are allowed to be on, and re-read both.
