Glossary

- **Domain** The VCC tenant. Skills, users, lists, and campaigns stay inside it. Planning your implementation
- **Skill group** Agents or supervisors who can take a campaign's work. A user and a campaign can have more than one. Skill groups
- **User profile** The permission template for a person. Not a campaign profile. Planning your implementation
- **Campaign profile** Overrides defaults such as ANI. One profile is assigned to a campaign. The same profile can be reused. Campaign profiles
- **Campaign** Inbound, outbound, or autodial. Blended is staffing language, not a fourth type. Inbound campaigns
- **DNIS** The number an inbound campaign answers. A stopped campaign does not answer. Inbound campaigns
- **Disposition** The outcome code on a call. Final disposition stops the other numbers on that record for the campaign. List dialing modes
- **List penetration** The default list walk: first number on every record, then the next number. List dialing modes
- **Vertical dialing** Finishes the numbers on one record before moving on. Community notes say the compass wording is easy to misread. List dialing modes
- **Preview** The agent sees CRM history before the dial. Dialer product page
- **Progressive** The outbound page describes one customer call per available agent. The dialer page also says adaptive pace. Quote the page you mean. Outbound product page
- **Power** A configured number of calls per agent, with an abandon throttle. Dialer product page
- **Predictive** Algorithmic pacing. Product guidance talks about teams larger than about ten agents. Dialer product page
- **Manual touch** No automatic dial. TCPA manual touch adds typing, blocks paste, and enables Dial on a match. TCPA manual touch
- **Max Abandoned Call Percentage** A campaign field with a warning if you change it. This lab does not state a numeric default. Default campaign settings
- **IVR module** A named block in the IVR Administrator's Guide, such as Menu, Play, If/Else, or Skill Transfer. IVR modules
- **Skill Transfer** Sends the call toward one or more skills. No skill selected means the Default queue in the community write-up. Skill Transfer functions
- **Default queue** Where a Skill Transfer with no skill goes, per the community article. Skill Transfer functions
- **Call variable** Reportable only after the edit permission and the reporting flag. Not historical. Call variables for reporting

- **Reporting role** Required, with a reporting permission, before standard reports appear. Generating standard reports
- **Call log** A report with filters. A July 2026 community article describes about 60 days unless retention is extended. Call log filters
- **Web2Campaign** One of the API names on the APIs and SDKs page. APIs and SDKs
- **CRM SDK** The path for a CRM that is not a named Plus adapter. APIs and SDKs
- **Web Connector** Opens a URL. Not the same object as a Plus adapter. APIs and SDKs
- **Plus adapter** The listed CRM integrations, using HTTPS and Secure WebSocket. Technical requirements PDF
- **G.711** The default codec in the technical requirements, described as uncompressed. Technical requirements PDF
- **DNS SRV** The preferred lookup for SIP targets in the technical requirements. Technical requirements PDF
- **TLS 1.2** The required TLS version. TLS 1.1 is not supported. Technical requirements PDF
- **Direct Connect** Layer-3 handoff, full duplex, BGP failover, in the technical requirements. Technical requirements PDF
- **Certified Caller** Five9's STIR/SHAKEN program. Not the same thing as a local ANI on a profile. Certified Caller
- **E911** Direct 911 with a dispatchable location. The data sheet names RedSky. E911 data sheet
- **Dispatchable location** The place responders can find the caller. A stale HQ address fails that test. E911 data sheet
- **MyE911** Org-admin history: time, user, number, location, recording, SIP invite. MyE911 call history
- **WEM** Workforce, quality, analytics, surveys, and recording. Native suite and a Verint partnership are both on the product page. Workforce engagement management
- **GenAI Studio** Knowledge and prompts for Five9 AI apps. This lab does not name a default model. GenAI Studio
- **Studio task key** The key copied from a ChatBot task into VCC for a digital IVA. Studio digital IVA with VCC
- **Agent Desktop Plus** The single agent screen. Same underlying technology as the prebuilt CRM adapters, per the desktop page. Agent Desktop
- **Retention** Separate clocks for audio, E911 recordings, agent data, campaign state, domains, and DIDs. Data retention
- **RFC 3261** The SIP specification. It does not choose your dial plan. RFC 3261
- **RFC 4733** Telephone events, the usual way DTMF rides in the media. RFC 4733

A note from the student behind this lab

This is an **independent, free, learning-only student project**. It respects every company and vendor, and every trademark belongs to its owner. It is **not affiliated with or endorsed by** any of them.

If anyone has a concern, the content will be removed or corrected promptly via the contact form at https://cyphermonkeylabs.com/#contact. Nothing here is sold. Happy to volunteer for any organization.

Confirm before relying on a number, a port, or a vendor case-study claim. Product behavior belongs to the cited page.
