Certifications and practice

No invented exam codes. The sales badge is a sales badge. Date every number.

1. **University is a catalog, not a secret exam code** Five9 University is the public training front door: online classes, webinars, instructor-led classes, train-the-trainer, and custom programs. The curriculum brief this lab read is dated April 2023. Treat the mix of courses as a dated brochure.
2. **The badge we could verify is a sales badge** Five9 IVA Sales Certified is a Credly badge. The public badge says five modules and a 20-question final, with a passing mark of 80 percent. The partner blog describes it as a sales certification for partners.
3. **Practice is the domain, not the badge** The objects you must be able to touch are the ones in the planning topic and the IVR chapter: skill groups, users, lists, dispositions, profiles, campaigns, and modules. A certification that never had you start a stopped inbound campaign did not finish the job.
4. **Version timelines go stale on purpose** Numbers you copy from a PDF are dates, not laws. The technical requirements this lab read named Salesforce managed package 2.46, ServiceNow releases Australia, Zurich, and Yokohama, JRE 8 updates 421, 451, and 461, and macOS 15 Sequoia, 26 Tahoe, and 27 Golden Gate. All of that is an October 2026 reading.
5. **How to answer without inventing** An interview answer in this lab has four beats: the object, the behavior, the page, and the gap. 'A stopped inbound campaign does not answer. The inbound topic says callers hear busy. I have not memorized a numeric abandon default.' That is a complete answer.
6. **A study week that stays inside the documents** Six sessions cover the floor without a fake exam. One: planning order and skills. Two: inbound, lists, and the three campaign types. Three: dial modes and the abandon warning, plus the pacing lab. Four: IVR modules and the builder. Five: desktop, CRM, and WEM as neighbors. Six: SIP stories, E911, retention, and one boss incident.
7. **What this lab will not pretend to be** Five9 Lab is an independent study floor. It is not Five9, not a partner portal, and not a place that can change your domain. The builder's JSON is not an import. The pacing chart is not the dialer. The 3D topology is a picture of failure, not a network map of your tenant.

Confirm before relying.

A note from the student behind this lab

This is an **independent, free, learning-only student project**. It respects every company and vendor, and every trademark belongs to its owner. It is **not**

affiliated with or endorsed by any of them.

If anyone has a concern, the content will be removed or corrected promptly via the contact form at https://cyphermonkeylabs.com/#contact. Nothing here is sold. Happy to volunteer for any organization.

Confirm before relying on a number, a port, or a vendor case-study claim. Product behavior belongs to the cited page.
