Zoom Phone and Teams are on the same API page

The APIs page also lists pre-built integrations with Zoom Phone and Microsoft Teams. It says those connections are so agents can reach someone to resolve a question or consult an expert. That is a UC story, not a CRM adapter.
The same page says the partner app marketplace has over 55 partner solutions. Over 55 is the page’s count. This lab did not open the marketplace and did not recount it. REST, on the same page, is how it describes access for agents, administrators, supervisors, and reporting users.
Keep UC names off the CRM list
Quote over 55 as their count

confirm. This lab did not open the partner marketplace, so over 55 is the API page’s sentence and not a fresh count. last checked 2026-10.
