Sister technologies are the names on the neighboring pages

Sister technologies, in this lab, means products the Five9 pages name as living beside the domain. The WEM page names Verint as a partner example beside native WEM. The API page names Zoom Phone and Microsoft Teams. The CRM lists name Salesforce, ServiceNow, and the other CRMs on those lists.
A sister is not a synonym. Verint is not native WEM. Teams is not Salesforce. The quality page's competency routing is not the skill-group chapter. Put the sister next to the domain and keep its own page.
Caption each sister with its page
Refuse unnamed products
