A bridge is a teaching map, not an import

A cross-platform bridge says how a person who knows another contact center might look for the same idea. Skill group is the Five9 queue the admin chapter describes. It is not a claim that another vendor’s queue object imports.
This chapter does not add gateway vendors, release names, or a migration wizard. Those sentences live on pages this chapter did not re-read. If you cannot open them, the bridge stops at the teaching sentence and the rest is confirm.
Label the bridge as teaching
Leave unread vendors off it
