Local caller ID is a profile choice

The outbound product page lists local caller ID as a business-efficiency tool, and campaign profiles are the documented place to override the default ANI. Showing a local number is a profile and number-plan problem, not a skill-group problem.
Certified Caller, on its own page, is the STIR/SHAKEN story. A local ANI does not by itself mean the call is signed. Keep those projects separate.
Override ANI with a profile
Keep STIR/SHAKEN as its own project
