Studio has regions

The technical requirements publish Studio portal hosts by region: five9.us, five9.au, five9.ca, five9.uk, and five9.br studioportal.io, plus older inferencecommunications.com names. A task built in the wrong region will not be the task your VCC domain can call.
SIP notes in that same part of the PDF, including UDP 5060 and a beta TCP 5061, are labeled next to Studio SBC material. Do not paste those ports onto every VCC trunk without checking which SBC family the domain uses. DNS SRV is the preferred way to find Five9 SIP resources.
Match Studio region to the domain
Prefer DNS SRV over a pinned IP

confirm. Studio signaling ports in the PDF are easy to misread as universal VCC trunk ports. Confirm which SBC your domain uses.. last checked 2026-10.
