The rest of the named CRMs

Dynamics 365, Zendesk, Oracle, NetSuite, and Epic are in the same Plus adapter list as Salesforce and ServiceNow. The PDF does not give this lab a package number for each of them. Absence of a number here is not absence of an adapter.

Treat each one as its own guide chapter. A Zendesk pop that fails is not fixed by a Salesforce package upgrade.

Give each CRM its own chapter

Do not reuse another product’s version
