IVA, foreign scripts, DNC, and leaving the platform

IVA Transfer hands the call to a Studio task. Foreign Script jumps to another IVR script. Set DNC is the removal action. Third Party Transfer leaves your agents. Language switches prompt language. These are five different exits. A diagram that says ’send to bot’ does not say which one.

Digital IVA integration, in the March 2026 Studio article, needs a Studio API key with Build permission and a ChatBot task key pasted into the VCC side. Voice IVA Transfer is not automatically that digital article. Confirm which channel you are wiring.

Name the exit module

Keep digital IVA and voice IVA in their own notes
