ServiceNow releases are named

The same PDF says the ServiceNow Plus adapter supports the Service Operations and
Configurable workspaces, and names the Australia, Zurich, and Yokohama releases. Those names
are a support list with a date on it, like the Salesforce package.
There is a portal chapter for configuring the Plus adapter for ServiceNow. Use it for the
steps. Use the PDF for which release you are allowed to be on, and re-read both.
Check the ServiceNow release list
Date it
