CTI is a named API, not a vibe

The APIs and SDKs page lists a Computer Telephony Integration (CTI) Web Services API next to Configuration, Reporting, Statistics, Web2Campaign, the CRM SDK, and Web Connectors. CTI, on that page, is one of those names.
Wikipedia's ACD article says an advanced distributor may use computer telephony integration as an input to the route. That is the general word. Five9's page is the product name. A screen pop, a click-to-dial button, and a package version were not on the pages this chapter read.
Use the API name the page printed
Leave screen pop unspecified
