A CRM note you can defend

A defendable note names the surface, the list, and the gap. Surface: Plus, prebuilt, toolkit, or bookmark. List: the API CRM names, the UC names, or the WFO actions. Gap: anything from an admin guide that did not open, marked confirm, with no URL and no guessed field.

The API page says integrations can often be done with minimal coding. Often and minimal are the page's words. They are not a project estimate. The desktop page's single screen is the agent experience it describes, not a count of browser tabs this lab measured.

Name the surface and the list
