Analytics and surveys sit beside the call Learn it in 5 minutes

The data sheet and the product page put interaction analytics and customer surveys next to QM and WFM. Analytics is how you see topics across many calls. A survey is how the customer scores the one call. They are not the abandon rate and they are not a disposition, unless you deliberately map them.
This lab does not claim a specific analytics vendor screen. Native WEM and a partner suite will not look identical. The question to ask is which topics you will act on.
