Troubleshooting

- **The DNIS does not answer.** A stopped campaign does not answer. Busy is not the same fact as a stopped campaign.
- **Callers land on a queue nobody staffed.** The community write-up says a Skill Transfer with no skill uses the Default queue.
- **The agent hears silence, or the caller does.** Media and signaling are different paths.
- **Voice is live and the CRM pane is blank.** Two channels. Fix the one that failed.
- **The agent cannot paste a phone number.** The mode is a physical control.
- **Customers hear a click and no agent.** An abandon is a pacing outcome, then a compliance posture.
- **A test 911 call would send responders to the old HQ.** E911 is a location product. The data sheet names RedSky.
- **Standard reports are missing for a supervisor.** Reporting is a role, not a hope.
- **The audio you need is gone.** There is no single keep-forever switch on the pages this lab cites.
- **The IVA will not return the caller to a person.** A bot without a door back is a trap.

A note from the student behind this lab

This is an **independent, free, learning-only student project**. It respects every company and vendor, and every trademark belongs to its owner. It is **not affiliated with or endorsed by** any of them.

If anyone has a concern, the content will be removed or corrected promptly via the contact form at https://cyphermonkeylabs.com/#contact. Nothing here is sold. Happy to volunteer for any organization.

Confirm before relying on a number, a port, or a vendor case-study claim. Product behavior belongs to the cited page.
